

MSDS Fax-Back & Medical Support

Overview

MSDSonline[®] offers a wide range of services — everything you need to build and maintain a compliant electronic MSDS management program. Our team of experts has been managing client MSDS libraries for more than 10 years. We offer timely project turnaround and competitive rates on all of our services. So if you're ready to make the jump from paper to electronic MSDS management, you've come to the right place.

With the Fax-Back service from MSDSonline your employees are never without access to your company's inventory of MSDS documents. Whether working in the field, in remote locations, or in an area with limited Internet or computer access, your employees can always receive an MSDS simply by calling our toll-free hotline.

Compliant Backup

Our Fax-Back service offers yet another effective back-up option for MSDS deployment. Ensuring compliance with OSHA Hazard Communication and Right-to-Know requirements, our automated fax technology works seamlessly with your MSDSonline account to deliver fax access to your company's site-specific database of MSDSs. What's more, if the requested MSDS is not in your library, our team of dedicated specialists will search the extensive MSDSonline database, which contains millions of indexed and searchable MSDSs, to find the document for you.

24 / 7 Access to Your MSDSs

Our Fax-Back service is available around-the-clock, 24 hours a day, 365 days a year. That means no matter what time of day or night, your employees always have access to safety information through a convenient toll-free hotline. In addition, a dedicated team of specialists, including registered nurses, emergency medical technicians, toxicologists, paramedics and pharmacists are on call to provide chemical exposure support if necessary.

Safety is Our Top Priority

At MSDSonline our mission is to provide easy-to-use solutions that help you deliver safety information to your employees in a timely and cost-effective manner. In fact, we've designed all our products and services with your employees' safety in mind. So, while we can't prevent accidents from happening, we can help improve workplace safety by giving you the tools to make critical information accessible to all your employees — all the time.

For pricing information, call us toll-free at 1.888.362.2007 (U.S. & Canada Only). Outside the United States, call 1.312.881.2000.

Benefits

▣ Around-the-Clock Employee Access

Our Fax-Back service is available 24/7/365 to ensure your employees always have critical safety information at their fingertips.

▣ Simple to Use

Your staff can simply call our toll-free hotline for fax access to your company's library of safety data sheets.
