

"My GM Account gives me complete control to build and maintain a compliant site-specific MSDS/chemical inventory."

GM Simplify MSDS Management & Compliance

Overview

As a safety professional you have a lot of responsibilities. Inventorying chemicals, ensuring your employees have access to safety data sheets, training employees and staying on top of regulatory requirements are just a few tasks on your plate.

Managing these programs using paper-based methods is costly, cumbersome and often leads to noncompliance. As a result, hazard communication (OSHA's HCS and Health Canada's WHMIS) is among the most frequently cited compliance violations annually, costing businesses millions in fines, penalties and potential litigation expenses.

MSDSonline[®] has responded by offering a suite of innovative on-demand EH&S compliance management products to help businesses of all sizes reduce the potential risks and liability associated with workplace exposures, injuries and illnesses.

Manage a Compliant MSDS/Chemical Inventory

The GM Account puts you in control, making you the "general manager" of your chemical inventory. Ideal for one administrator at a single location, the GM Account delivers on-demand access to a suite of tools that enable you to build and maintain a compliant, electronic MSDS/chemical inventory.

In addition, you get around-the-clock access to our industry-leading online database containing millions of indexed and searchable safety data sheets. You also get a suite of basic MSDS/chemical inventory management tools that allow you to assign chemicals to site-specific locations or to custom groups for better management and simplified reporting.

Streamline Hazard Communication Compliance

Organize your inventory the way that makes sense for your facility — by product groups, storage locations, regulatory categories, you name it. You also can assign synonyms, or create custom keywords to help quickly sort your inventory, find product MSDSs and generate inventory reports.

What's more, your MSDS/chemical inventory can be printed or saved to a CD, DVD or external memory drive, giving you a fully compliant electronic hazard communication solution.

It's a comprehensive and compliant safety management solution, all in one easy-to-use and familiar Web environment. See back for a detailed list of features and a comparison of all our MSDS management accounts.

To learn more, visit www.MSDSonline.com or call us toll-free at 1.888.362.2007 (U.S. & Canada Only). Outside the United States, call 1.312.881.2000.

Benefits

▣ Millions of MSDSs at Your Fingertips

24/7 access to the industry's leading database of safety data sheets ensures your company's MSDS library is up-to-date and in compliance.

▣ Simplify HCS Compliance

Easy-to-use tools help you meet key hazard communication (OSHA / WHMIS / GHS) requirements.

▣ Regulatory Compliant

Multiple back-up options means your system meets OSHA, WHMIS and other regulatory requirements for electronic MSDS/chemical management.

▣ Low Cost of Ownership

There's no software to install or maintain and you get immediate access to new features and enhancements.
