Our comprehensive and flexible services mean you're only a phone call away from meeting your compliance objectives.

▣ Reliable Implementation

Our best practices approach ensures your implementation is seamless and requires little to no interaction from your IT department.

▣ Quick & Affordable

We offer timely project turnaround and competitive rates on all of our services.

▣ Excellent Customer Care

Our dedicated support team takes pride in your satisfaction. You get ongoing access to implementation assistance, product training, general and technical support and more.

Overview

Managing your MSDSs electronically is one of the easiest ways to eliminate time-consuming administrative costs from your workplace safety and hazard communication programs.

MSDSonline[®] offers a range of services to help you build and maintain a compliant electronic MSDS management program. So if you're ready to make the jump from paper to electronic MSDS management, we can get you up and running quickly.

MSDS Library Build

- **MSDS Scanning & Indexing** – Send us your paper safety data sheets and we'll professionally scan, convert them to PDF-format, index and post them to your secure eBinder.*
- **eBinder Valet** – Send us your inventory list and we'll build your MSDS library. We'll contact manufacturers on your behalf to obtain the most recent version. We'll index and add the MSDSs to your secure eBinder.*
- **Data Conversion** – If your electronic MSDS data already exists, we can import and convert the information into our system, so you won't lose any of the work you've already completed.

MSDS Updates / Verification

- **MSDS Updates** – We'll work with you to make sure your MSDS library is up-to-date and compliant. Send us periodic updates to your inventory and we'll make sure your online eBinder* is reviewed and updated.
- **MSDS Verification** – We'll periodically review your online eBinder* to verify that you have the latest versions. We'll verify that the current version is the most up-to-date and stamp the document with the verified date. If we find more recent versions, we'll index those MSDSs and post them to your secure eBinder.*

Special Projects

- **MSDS Indexing** – We'll index the MSDSs in your library on any information, beyond our standard fields, that is contained within the 16 sections of an MSDS.
- **Custom Label Creation** – If you have unique secondary labeling requirements, we'll work with you to determine the specific content and size of label you require and then create a custom template that you can use directly from your MSDS management account.
- **Regulatory Cross Referencing** – Need to quickly identify and report on chemicals that appear on various watch lists? We'll index the ingredients for your chemical products, and then compare those ingredients against various watch lists and flag your MSDSs appropriately.

On-Site Chemical Inventory Audit

An effective hazard communication plan starts with a complete and accurate inventory of the chemicals you use on site. We'll come to your workplace and conduct a thorough audit of your site, so you can get a complete assessment of your hazardous chemical footprint.
