

# GM ACCOUNT

Our GM Account provides unlimited access to our industry-leading safety data sheet database, plus the tools you need to manage your chemical inventory — all in a newly redesigned system that makes it even easier to ensure compliance.

## Simplify Safety Data Sheet Management and Compliance

As a safety professional, you're asked to do a lot with few resources. Administrative compliance tasks such as inventorying chemicals, updating safety data sheet binders and filling out regulatory reports requires time that could be spent on other important safety issues.

What's worse, managing these programs using paper-based methods is costly, cumbersome and often leads to noncompliance. As a result, hazard communication (including OSHA's HCS and Health Canada's WHMIS) is among the most frequently cited compliance violations annually, costing businesses millions in fines and potential litigation expenses — and now, changes to compliance requirements resulting from GHS adoption have made things even more complicated.

Our online GM Account blends more than 20 years of software innovation with industry best practices to help you simplify compliance. Rebuilt on a new platform with new and improved features for even greater ease-of-use and quicker implementation, it delivers on-demand access to tools that enable you to build and maintain a compliant, electronic safety data sheet and chemical inventory. It's ideal for one safety professional (administrator) at a single location. It gives you the tools to be the "general manager" of your SDS / chemical inventory and to take charge of your HazCom compliance initiatives.

**Online Safety Data Sheet Access** — The GM Account is a cloud-based system that gives you unlimited access to our industry-leading online database of millions of manufacturer-original safety data sheets. You can stop wasting time searching websites and calling manufacturers to obtain missing or out-of-date safety data sheets. Our Auto-Update feature lets you know when an updated SDS is available, which is especially useful to help ensure compliance with GHS-aligned hazard communication standards.

**Chemical Inventory Management** — The GM Account works seamlessly across multiple PC, laptop and mobile device platforms so you're in control of your chemical inventory wherever you are. Enhanced functionality lets you easily organize your inventory the way that makes sense for your facility needs — including by product groups, storage locations and regulatory categories.

You can also assign synonyms or create custom keywords to help you quickly sort your inventory, find safety data sheets and generate inventory reports.

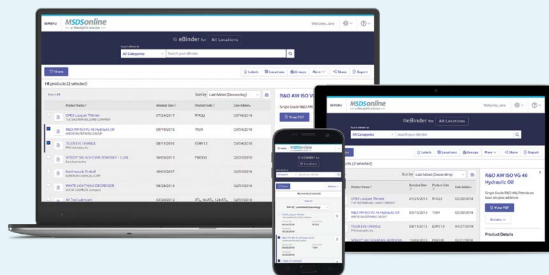

Plus, your SDS and chemical inventory can be printed or saved to a CD, DVD or external memory drive, giving you a variety of backup options for a fully compliant electronic hazard communication solution.

**Discover for yourself why thousands of safety professionals turn to MSDSonline, VelocityEHS solution, to streamline their hazard communication compliance tasks.**

## Benefits

- Millions of SDSs/MSDSs at your fingertips, 24/7
- Easy-to-use tools to help meet hazard communication requirements (HazCom / WHMIS / GHS)
- Mobile accessible
- Multiple back-up options to meet regulatory requirements for SDS/chemical management
- No software to install or maintain, giving you immediate access to new features and enhancements

Features	GM	HQ
Service Term	1-Year	Up to 3 Years
1 Account Administrator & 1 Additional MSDS Management License	Account Admin Only	•
Additional MSDS Management Licenses	Optional (\$)	Optional (\$)
Multi-Site Compatibility	–	•
Mobile-Enabled Functionality	•	•

### SDS / MSDS Management

Search MSDSonline Database	Unlimited	Unlimited
Open, View, Print SDSs / MSDSs	Unlimited	Unlimited
Save SDSs / MSDSs to Secure eBinder	Unlimited	Unlimited
Upload Local SDS / MSDS Files to eBinder	Max.100†	Max.300*
Request Missing SDSs / MSDSs	Max. 25†	Max. 150*
Auto-Update New Versions	•	•
Assign & Manage Products to Multi-Level Locations	•	•
Assign Products to Custom Groups	•	•
Access MSDSonline Master Chemical List (for Indexing)	–	•
SDS / MSDS Indexing Modules (e.g., PPE, Health Hazards, etc.)	–	•
Generate Product Summary Sheets	•	•
Generate Workplace Labels (Brady, DuraLabel & Avery Integration)	–	•
Generate GHS labels in multiple languages	–	•
Generate Exportable Reports	•	•
Batch Print SDSs / MSDSs	•	•
SDS / MSDS Library Backup (PC, CD, DVD, Flash Drive, etc.)	Optional	•
Multi-Language Right-to-Know SDS / MSDS Search Interface	–	•
Employee Access to MSDSonline Database	–	•

### Chemical Inventory Management

Multi-Level Location Tracking & Mapping	•	•
Plan1 First Responder Share Service	–	•
Detailed Container Tracking & Reconciliation Reporting	–	•
Barcode Generation & Printing	–	•
SDS / Chemical Management Mobile Application	–	•
Banned Chemical Flagging & Management	•	•
Advanced Material Approval Routing	–	•
Configurable Email Notifications	–	•
Unit of Measure Conversion & Chemical Quantity Calculation	–	•

### Environmental & Regulatory Reporting

DHS List Flagging & Threshold Reporting	–	•
EPCRA Section 302 EHS List Flagging & Threshold Reporting	–	•
EPCRA Section 313 Form R Chemical Release Reporting	–	•
Exportable Product Cross-Reference Reports	–	•
Regulatory List Cross-Reference (Summary Sheet) Module	–	•
Federal, State & Global List Cross-Referencing	–	–

\*Quantity listed is the maximum allotted for a 3-year contract.  
Additional Requests & Uploads are available for purchase.
