

## HQ RegXR Account

Our HQ RegXR Account is an easy and affordable cloud-based solution that simplifies hazardous chemical management and streamlines regulatory reporting. The path to sustainability starts here.

## Streamline Environmental Management & HazCom Compliance

*"It is a great tracking tool of what chemicals we are using and in which locations. Great way to find SDS sheets."* — David Buck

MSDSonline understands that properly maintaining regulated materials in your inventory starts with knowing exactly what chemicals you have on-site, where they are used and stored, the precise quantity of each, and having immediate access to their corresponding up-to-date safety data sheets.

Our HQ RegXR Account is ideal for single- and multi-facility businesses that need a more efficient, cost-effective way to manage chemical and environmental hazards in the workplace. It's an easy-to-use system that enables you to account for, report on and limit chemical hazards in your organization.

### Simple Safety Data Sheet Compliance

The document churn resulting from OSHA and Health Canada's adoption of GHS has made it imperative that employers update their SDS / MSDS libraries, and we can help.

Our HQ RegXR Account combines unlimited access to the industry-leading database of manufacturer-original safety data sheets with easy-to-use deployment and chemical inventory management tools to help you more cost-effectively manage your company's on-site chemicals and comply with global hazard communication requirements.

Our cloud-based HQ RegXR Account streamlines safety data sheet obtainment, management and chemical reporting, and works seamlessly across multiple PC, laptop and mobile device platforms, giving your employees right-to-know access to vital safety information, such as your company-specific SDSs and secondary container labels available in a variety of formats. GHS labeling

functionality features integration with key Brady and DuraLabel printers as well as Avery labeling software.

### Powerful Chemical Inventory Management

With our HQ RegXR Account, you get on-demand container-level chemical management, tracking, mapping and compliance reporting tools to help you maintain a complete and accurate picture of the chemical hazards in your work environment. Plus, you can easily share this potentially lifesaving information with emergency responders, using our free Plan1 First Responder Share Service. At the same time, you can utilize advanced chemical approval and notification workflow tools to gain greater control over what chemicals to accept or ban from your work environment.

### Robust Regulatory Reporting

Our sophisticated regulatory cross-referencing (RegXR) engine automatically identifies and flags products and ingredients that are regulated on various state, federal and international hazardous substance lists, making it easier for you to comply with regulatory reporting requirements. It's a powerful, all-encompassing solution for helping you better understand the material composition of your chemical products, simplify compliance reporting, and facilitate the use of more sustainable raw materials.

**Discover for yourself why thousands of employers trust their chemical inventory to MSDSonline — A VelocityEHS solution.**

## Features

	HQ	HQ RegXR
Service Term	Up to 3 Years	Up to 3 Years
1 Account Administrator & 1 Additional MSDS Management License	•	•
Additional MSDS Management Licenses	Optional (\$)	Optional (\$)
Multi-Site Compatibility	•	•
Mobile-Enabled Functionality	•	•

### SDS / MSDS Management

Search MSDSonline Database	Unlimited	Unlimited
Open, View, Print SDSs / MSDSs	Unlimited	Unlimited
Save SDSs / MSDSs to Secure eBinder	Unlimited	Unlimited
Upload Local SDS / MSDS Files to eBinder	Max.300*	Max.300*
Request Missing SDSs / MSDSs	Max. 150*	Max. 150*
Auto-Update New Versions	•	•
Assign & Manage Products to Multi-Level Locations	•	•
Assign Products to Custom Groups	•	•
Access MSDSonline Master Chemical List (for Indexing)	•	•
SDS / MSDS Indexing Modules (e.g., PPE, Health Hazards, etc.)	•	•
Generate Product Summary Sheets	•	•
Generate Workplace Labels (Brady, DuraLabel & Avery Integration)	•	•
Generate Exportable Reports	•	•
Batch Print SDSs / MSDSs	•	•
SDS / MSDS Library Backup (PC, CD, DVD, Flash Drive, etc.)	•	•
Multi-Language Right-to-Know SDS / MSDS Search Interface	•	•
Employee Access to MSDSonline Database	•	•

### Chemical Inventory Management

Multi-Level Location Tracking & Mapping	•	•
Plan1 First Responder Share Service	•	•
Detailed Container Tracking & Reconciliation Reporting	•	•
Barcode Generation & Printing	•	•
SDS / Chemical Management Mobile Application	•	•
Banned Chemical Flagging & Management	•	•
Advanced Material Approval Routing	•	•
Configurable Email Notifications	•	•
Unit of Measure Conversion & Chemical Quantity Calculation	•	•

### Environmental & Regulatory Reporting

DHS List Flagging & Threshold Reporting	•	•
EPCRA Section 302 EHS List Flagging & Threshold Reporting	•	•
EPCRA Section 313 Form R Chemical Release Reporting	•	•
Exportable Product Cross-Reference Reports	•	•
Regulatory List Cross-Reference (Summary Sheet) Module	•	•
Federal, State & Global List Cross-Referencing	–	•

## System Requirements

- Internet access
- Internet Explorer 7.0+, Firefox 3.5+ (Mac and Windows), Safari 5.0+ (Mac), Chrome 6.0+
  - JavaScript, AJAX and cookies enabled, and DOM storage enabled
- Adobe® Reader® 9+
- VGA resolution of 1024x768 or higher recommended
- MSDS Library Backup requires Windows® XP (SP-3), Vista, 7, 8, or 8.1, 10, Microsoft.NET 4.0 Framework or higher

## Benefits

### Simplify Compliance

Easy-to-use tools help you meet hazard communication requirements (OSHA / WHMIS / GHS), including hazard determination, right-to-know access, labeling, safe chemical handling, PPE, and more.

### Mobile Access

Our online accounts are mobile optimized, and our SDS / Chemical Management mobile app makes it possible to access SDSs and chemical inventory information offline, when internet connectivity is limited, as well as to scan barcode/QR code labels for greater container-level control over your inventory.

### Streamline Regulatory Reporting

Our powerful regulatory cross-referencing engine identifies products, as well as ingredients that are regulated on various state, federal and international hazardous substance lists.

### Facilitate Sustainability

Better understand the composition of chemical products, simplify environmental and regulatory compliance requirements and move toward using more sustainable and renewable raw materials.

### Quick ROI & Low Cost of Ownership

The HQ RegXR Account pays for itself by eliminating time-consuming, manual administrative tasks.

\* Quantity listed is the maximum allotted for a 3-year contract. Additional Requests & Uploads are available for purchase.
