

## HQ REGXR ACCOUNT

With hundreds of new and improved features, our newly designed HQ RegXR Account gives you greater control than ever before to streamline chemical management and regulatory reporting.

### Simplify Chemical Management and HazCom Compliance

Properly maintaining your inventory of regulated materials starts with knowing exactly what chemicals you have on-site, where they are used and stored, the precise quantity of each, and having immediate access to up-to-date safety data sheets.

Our HQ RegXR Account — rebuilt on a new chemical management platform that's even easier to use and quicker to implement — provides an efficient, cost-effective way to manage workplace hazards and empower workers to take a more active role in safety. It combines more than 20 years of software innovation with industry best practices to give both single- and multi-facility businesses a centralized, mobile-enabled system to account for, report on, and limit hazardous chemicals in the workplace.

**Safety Data Sheet Compliance** — GHS adoption has made it imperative that employers get their chemical inventory in order. Our cloud-based HQ RegXR Account provides unlimited access to the industry-leading database of manufacturer-original safety data sheets — as well as robust chemical inventory management, deployment, back-up, and reporting tools — so you can more easily and efficiently manage your on-site chemicals and comply with a wide range of global hazard communication and regulatory requirements.

The mobile-enabled HQ RegXR Account works seamlessly across PC, laptop and mobile device platforms to give your employees easy right-to-know access to your SDSs wherever they are, with enhanced language capabilities to ensure vital safety information is available in the languages they understand. Plus, flexible labeling functionality makes it easy to create GHS-aligned secondary workplace container labels, featuring integration with key labeling printer and software vendors like Brady, Graphic Products / DuraLabel and Avery.

**Chemical Inventory Management** — Our HQ RegXR Account provides sophisticated container-level chemical management, tracking, mapping, and reporting tools, including an expanded location structure that lets you replicate global, complex organizational hierarchies with ease. These tools give you greater visibility and control over chemical hazards — and you can even share potentially lifesaving chemical information with emergency responders via our free Plan1 First Responder Share Service.

At the same time, you can utilize advanced chemical approval and notification workflow tools to gain greater control over what chemicals to accept or ban from your work environment.

**Regulatory Reporting** — With expanded reporting options and our powerful regulatory cross-referencing (RegXR) engine — which automatically identifies and flags products and ingredients that are regulated on various state, federal and international hazardous substance lists — the HQ RegXR Account eliminates the complexity of meeting regulatory reporting requirements. It's an all-encompassing solution that helps you to better understand your chemical products' material composition, simplify compliance and facilitate the use of more sustainable raw materials.

Discover for yourself why thousands of companies trust their chemical inventory to MSDSonline — a VelocityEHS solution.

### Benefits

- Millions of SDSs/MSDs at your fingertips, 24/7
- Easy-to-use tools to help meet hazard communication requirements (HazCom / WHMIS / GHS), including right-to-know access, labeling, safe chemical handling, PPE, and more
- Mobile functionality, including a convenient mobile app that lets you and front-line workers access and manage SDSs and chemical inventory information even while offline
- Robust regulatory cross-referencing tools to streamline reporting and facilitate sustainability initiatives
- Quick ROI and low cost of ownership

| Features   | HQ            | HQ RegXR      |
|--|---------------|---------------|
| Service Term   | Up to 3 Years | Up to 3 Years |
| 1 Account Administrator & 1 Additional MSDS Management License | •             | •             |
| Additional MSDS Management Licenses                            | Optional (\$) | Optional (\$) |
| Multi-Site Compatibility                                       | •             | •             |
| Mobile-Enabled Functionality                                   | •             | •             |

### SDS / MSDS Management
